Server Maintenance Schedules

Humboldt State University ITS reserves specific time windows for maintenance of individual servers in the central computing system. The table below shows the routine maintenance windows for each system.

Note: Not all systems will be unavailable for the entire maintenance window. You will find more exact estimates posted to the System Status report [1] and included in the weekly University Notices.

If you anticipate any problems with these routine maintenance times, please send an email to help@humboldt.edu [2]. Adjustments may be made to the schedules to accommodate scheduling conflicts.
