

FALL 2012 BIOLOGICAL SCIENCES SEMINAR SERIES
Fridays in SciB 135 @ 4:00 PM

JOINTLY SPONSORED BY:

BIOLOGY GRADUATE STUDENT ASSOCIATION
DEPARTMENT OF BIOLOGICAL SCIENCES

Sept 28	Josh Mackie San Jose State University	Forward & Reverse: Evolution of Cadmium resistance in marine oligochaete worms
Oct 12	Sean Craig Humboldt State University	Cryptic Species & Marine Invasions in Harbors & Bays along the California Coast
Oct 19	Liz Whitchurch Humboldt State University	Hormones and hearing: Effects of estrogen on the plainfin midshipman fish ear
Oct 26	Rick Zechman Humboldt State University	Molecular Phylogenetics and evolution of the green seaweeds (and a previously unrecognized lineage of “deep-water” algae)
Nov 2	Julia Parrish Univ. of Washington	Stranding Networks along the Pacific Coast (not official title)
Nov 16	Michael Boyle Smithsonian Institution	Evolution & Development in marine Sipunculid worms (not official title)
Nov 30	Karina Nielsen Sonoma State University	Synoptic forcing and local scale dynamics of surfzone phytoplankton in the northern California Current Ecosystem over 9 years and 8 degrees of latitude
Dec 7	Susan Harrison UC Davis	Ecological effects of climate change in the Siskiyou: Lessons from re-sampling Robert Whittaker’s 1949-1951 study plots

3rd Version (9/26/2012)
