

!! PLEASE NOTE CHANGE OF LOCATION

SPRING 2009 BIOLOGICAL SCIENCES SEMINAR SERIES (Fridays in NR 101 @ 4:00 PM)

JOINTLY SPONSORED BY:

BIOLOGY GRADUATE STUDENT ASSOCIATION

DEPARTMENT OF BIOLOGICAL SCIENCES

Feb 5	Marie Csete Emory University	Stem cells, pain and ethanol: modeling common problems using stem cells
Feb 12	Robert Van Pelt U Washington & HSU	Epiphytes in temperate rain forest canopies
Feb 26	Theo Palmer Stanford University	Stem cells in neurological health and disease
Mar 26	Daniel Costa UC Santa Cruz	Climate change and upper trophic levels: the importance of marine mammals in marine ecosystems
April 2	Greg Gilbert UC Santa Cruz	The problem with relatives: phylogenetic ecology and forest diseases
April 9	Matthew Smith Duke University	Neotropical ectomycorrhizal fungi: above- and belowground approaches to documenting diversity
Apr 16	Tom Carlberg California Lichen Society	Rarity, Endemism, Distribution, Evolution - a Primer for Lichen Conservation
Apr 23	Brenda Grewell UC Davis & USDA-ARS	Home Away from Home: Phenotypic Plasticity and the Invasion of Uruguayan Primrose-Willow (<i>Ludwigia hexapetala</i>) in Pacific West States
Apr 30	Robert Blelloch UC San Francisco	Small RNA Regulation of Embryonic Stem Cells

Revised 04/20/2010
