

## Google Apps :: Smartphones

By standardizing on [Google Apps](#) [1], Humboldt State University has made it easy for you to access University-related content on your smartphone. You can find a complete list of the phones Google supports at [mobile.google.com](http://mobile.google.com) [2].

### Choosing a smartphone

Picking a phone is a personal choice. You may want a particular cellular carrier, a specific brand, a touch screen, or a certain shape that feels right in your hand. The customer service representative where you purchase your smartphone will be able to help you figure out if a phone works with Google Apps and configure your device to connect to Google Apps. Print this page and take it with you to help them.

**Discounts:** Most local carriers offer a discount to state employees on the price of the phone as well as the monthly fee. A staff ID or a pay stub will be sufficient to demonstrate your status as a state employee.

### Configuring your smartphone

You'll find links below to configuration instructions for some of the most popular smartphones. You can also access this information at [mobile.google.com](http://mobile.google.com) [3] or [m.google.com](http://m.google.com) [4] on your phone; when prompted for a user name, use your full HSU email address - the one that looks like [abc123@humboldt.edu](mailto:abc123@humboldt.edu) [5].
