Extension 5000

Ethernet Cable Request Form

In order to maintain the warranty on the cabling infrastructure installed on the new network, network cables for laptops and computers connecting to the network must be specific. To accommodate users who move about campus using various connections, i.e. classrooms, we will provide one additional cable (25 foot) upon request. If you require more than one, you may purchase additional cables. Once your request has been received, via email netops@humboldt.edu or fax (extension 6161), we will label the cable for you and contact you when it is ready.
