

ACCELERATE YOUR PDF PRINTING

Academic Computing – February 2004

There have been reports of slow printing of Adobe PDF documents in the Academic Computing labs. This method reduces the printing time (see Figure 1).

- 1) Open the PDF document that is to be printed
- 2) Select **Print...** from the File menu
- 3) From the pop-up menu, select **Acrobat Reader (1)**
- 4) Choose **Print as Image** as the **Print Method (2)**
- 5) Click **Print (3)**
