

# NSSE 2002 (Humboldt State)

## Additional Comments

I really enjoy my schools environment. The faculty, and staff are really friendly; they seem to care about the well-being of the students. They also highly value thhe students opinion.

Humboldt State University is the best school ever. They are very open and interested in diversifying and understanding. There are many clubs and organizations on campus to find what you are looking for.

This sucked

I don't know who told you that this survey takes only 10 minutes, it took me over 30 minutes

The Leadership Minor is what made me have success here at HSU, so i just waned to give some props to that.

I think that overall I had a good college education at HSU and I think that I really gained a lot out of it. I love that the school has the priority of putting out well rounded peoples into the populace. I really loved my time here, I think I learned way more about myself than I would have at any other school.

blah blah blah

I do not see how the question relating to Sept. 11th has any bearing on my educational experience. If anything, I did not feel that my options of that question were available. Sept. 11th affected everyone, and yet in education, it makes me realize what really is out there is what we ARE NOT learning in our classrooms. Our education is run by our government and maintained through their policies and biases. ... Also, the question pertaining to zipcode, gender, and ethnicity I feel is inappropriate to the study of education at this college. If this college has taught me anything, it has been the choice of revealing this information. In this survey you did not give me a choice, my only choice has been to not do the survey. Please keep more choices in the questions available, or not have them at all... thank you for your time.

The biggest problems we have in our university are professors sleeping with students, which is no big secret, but curiously it almost seems accepted and ignored--tenure and all that I suppose and or using their power to take advantage of students, this goes for non-tenured folks as well -- besides institutionalized racism of course. Other than that, this is a great university.

I have had a woderful experience at HSU. I feel the education, Nursing with a minor in psychology, has equiped me with the knowledge I need to be a success in the health care system. I appreciate all my instructors who gave a tremendous amount of time, energy and thought into my education.
