

Entry/Mid-Level Fisheries Biologist

EDAW seeks an entry- to mid-level fisheries biologist / aquatic ecologist to join its thriving natural resources group based in Sacramento, California. The successful applicant will provide a supporting role in fisheries, aquatic ecology, water quality, and hydrology technical work involving ESA permitting, ecological restoration, resource management planning, biological impact analysis for CEQA and NEPA documents; and coordination with clients and regulatory agencies. 2 to 5 years of prior consulting experience is preferred, but non-consultant candidates with relevant experience are encouraged to apply as well. **EDAW is an equal-opportunity employer. See our website for more information: www.edaw.com under “careers.”**
