Pay-for-Print :: Installing Windows Printers

To install printers on your Windows laptop, follow these instructions:
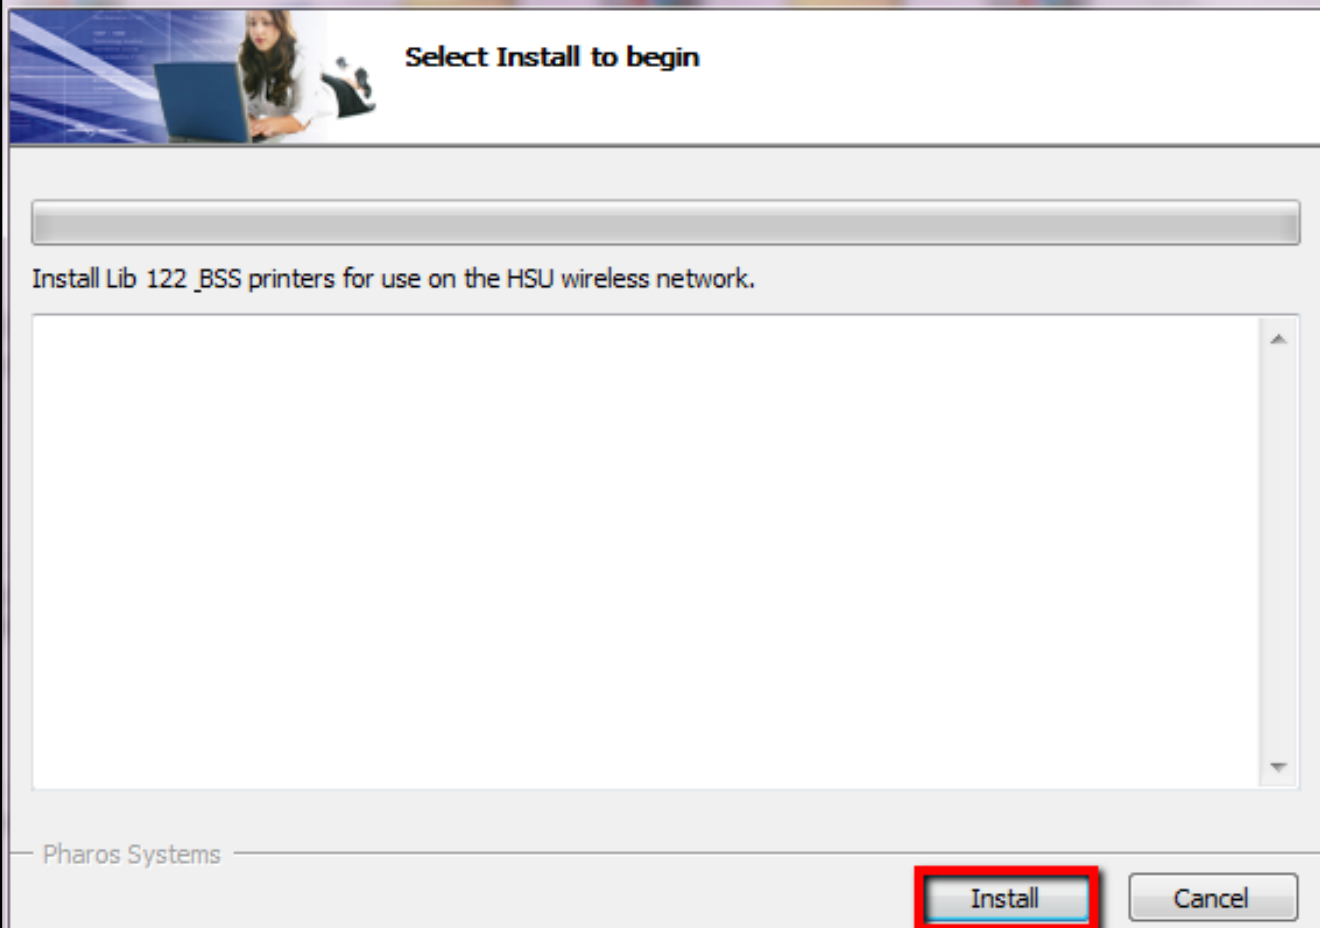

Step 1: Download the printer installer tool [1]**.** Save the file when prompted. Take note of where you've saved it (typically your Desktop or Downloads folder)
Step 2: Locate the file (WirelessPrinters_for_Lte.exe) that you just downloaded (typically it will be on your Desktop or in your Downloads folder). **Double-click** on the installer to run it.
Step 3: Click the Install button (in the lower right-hand corner) to begin the install process. (It may take several minutes for the installation to complete). Note: If you have Sophos Antivirus installed, it may quarantine one of the files during the installation process. This file really is safe and is NOT a virus, so don't worry if you see a message that the file was quarantined.
Step 4: When the installer has finished, **click the Finish button**.

You should now have the following printers available to you:

1. BSS316-Printer1-WiFi
2. BSS316-Printer2-WiFi
3. Lib122-Printer1-WiFi
4. Lib122-Printer2-WiFi
5. Lib122-Printer3-WiFi

To print to one of these printers, see our printing instructions [2].
