

Summary of Changes Incorporated in Final Recommendations based on Campus Feedback
March 6, 2020

1. Music B: Deleted recommendation for major reconfiguration of existing non-ADA single occupancy restrooms entered through adjoining practice rooms to be compliant with ADA and have one accessible from a corridor due to space limitations for critical program needs.
2. Recommend that any new construction or major renovations should consider including ADA accessible gender-inclusive bathrooms.
3. Moved the recommendation to convert Women's Room on the 3rd floor of BSS up to Year 1 instead of Year 3 based on feedback to create gender inclusive facilities in that building and at that end of campus sooner.
4. Moved Wildlife & Fisheries recommendation to convert the Men's Room on the 2nd floor to Year 3 instead of Year 1 (swapped time frame with item 2 above since Wildlife & Fisheries just gained a gender inclusive restroom this year).
5. Gist Hall: Added recommendation to convert Women's Room (RR-W-1A) at first floor to gender inclusive. This is adjacent to a single occupancy restroom that is frequently unavailable. There are other Men's and Women's restrooms on this floor.
6. Founders Hall: Added recommendation to both Mens and Womens rooms on 1st floor (end of each wing) gender inclusive, include addition of sink in ADA stalls in each restroom for cleaning menstrual cups in privacy. This would reduce walking distances to restrooms, update the facility lay-out from the traditional single sex restrooms at the opposite ends of the building. As there are currently two men's and women's on the first floor, this change would retain one men's and one women's room on the first floor.
7. Made minor revisions to the implementation timeline for Housing based on input from Residential Life and Housing.
