The Grammar of Graphics:
A Framework for Designing Data Visualizations

**Presenter:** Prof. Rosanna Overholser

Figure 2.2 From data to graphic

Abstract: It's Love Data Week! Bring your laptop for an guided exploration of chocolate data. Leland Wilkinson's Grammar of Graphics is a software agnostic framework for designing visualizations of datasets. I'll discuss a few key principles of this framework and then give the audience a chance to "learn-by-doing" by designing their own visualization of chocolate ratings just in time for Valentine's Day. No special software or programming skills are needed, just a laptop with internet access or a pencil and paper.
