**Spring 2026 MATH & DATA SCIENCE Colloquium Series**

# **The Shape of the Space of Quantum Gates**

**Dr. Tyler Evans**

**Department of Mathematics & Data Science  
Cal Poly Humboldt**

In quantum computing, one-qubit quantum gates can be represented by certain linear operators on a two-dimensional complex vector space. In this talk, we visit these gates from a geometric point of view and ask: *what does the space of all one-qubit quantum gates look like?*

**THURSDAY**  
**Feb. 12, 2026**

**4:00 PM**  
**BSS302**
