

**The Redwood Science Project, in partnership with the
California Environmental Legacy Project present**

Film, Media and Science Education

Film, Media and Science Education July 25-29, 2011

Film, Podcasts, and still imagery can be great learning tools, especially when used with appropriate pedagogical approaches. During this week-long institute we will explore a variety of media in science education including review and evaluation, discuss appropriate use under copyright law, and develop model units of study which make use of media. Additionally, we will examine the basic tenets of media pre-production including treatment and script development that will provide a working knowledge enabling participants to play education advisory roles on media projects. Previous participants are encouraged to join the institute for the advanced track that builds on prior work and collaboration opportunities with current media projects. This year's institute will focus on Coastal Redwood Forest Systems and will be led by Dr. Jeffrey White and Dr. David Scheerer.

Natural History Educators, College Students, and the General Public are invited to attend!

***Location:* Humboldt County**

***Regular Fee:* \$395**

***Students & K-12 Partner Fee:* \$245**

***Stipends:* Please inquire about eligibility**

***Optional Course Credit:* 2 units**
